Design tips

Colour:

Keep the number of colours used to a minimum. If you have corporate colours, it will be beneficial to use them for consumer recognition.

Layout:

Try not to clutter the space with large amounts of text or too many images. Simple, clear and concise information and layout makes the best impression.

Text:

Text is more easily read if it is positioned near the top of the banner.

Contact Details:

Perhaps only a web address or a phone number are all that's needed. Alternatively, you might include your address, email address, fax number or freecall number.
